DESIGNED FOR YOUR DREAM KITCHEN

The Sharp® SDH3042DB Induction Cooktop is a powerful, beautiful addition to your dream kitchen. The black mirror finish of the premium Schott® glass surface is a perfect match and can be combined with our Easy Wave Open Microwave Drawer™ and our European Convection Built-In Single Wall Oven.

The four cooking zones give you more flexibility to orchestrate even your most elaborate entertaining. The SDH3042DB features a variable-sized zone and a convenient cooling zone. More precise than gas, more efficient than electric, the Sharp Induction Cooktop is faster than either. There is a kitchen timer, and even a Power Boost for those times when you just need that pasta water to boil. The Simmer Enhancer option provides low, consistent cooking performance for your most delicate soups and sauces. Heat is generated directly into the cookware itself, so there is less wasted energy to heat up your kitchen. And without an open flame or radiant coil, spills and splatters are less likely to burn, and a breeze to clean up.

The SDH3042DB has advanced safety features. All of the cooktop controls can be locked-down. Cookware must be present for a cooking zone to turn on, so you won't accidentally turn it on, or leave it on after you remove the pan. Plus all cooking zones countdown and turn themselves off after 120 minutes so kitchen mishaps are less likely.

Powerful and efficient, fast and flexible, the beautiful Sharp SDH3042DB Induction Cooktop is certainly Simply Better Living.

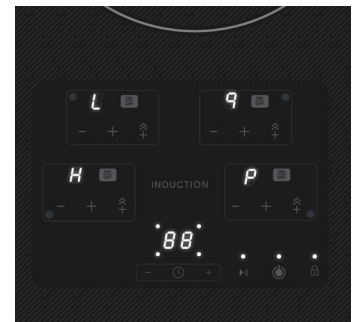

The residual heat indicator lets you know if a cooking zone is still hot.

Use the convenient cooling zone to quickly and smoothly move a pan off an active zone.

Simmer Enhancer precisely holds the temperature for extraordinarily consistent simmering.

Bright white LED controls make the touch glass clear and easy to read.
